

The baby bottle campaign is a straightforward, impactful, and innovative method to generate funds for A Hope Center. This initiative project serves as an excellent project for churches, youth groups, small groups, and more to demonstrate community love and support.

Every penny collected directly funds programs and services, such as pregnancy tests, life-affirming ultrasounds, parenting classes, and material assistance. Join us in making a meaningful impact, one bottle at a time.

Organizing a baby bottle campaign with A Hope Center is simple. We supply you with bottles, weekly announcements, and more. You can find all these materials at ahcfriends.org/baby-bottle-campaign/

1 Plan

Set the official launch date of your campaign as well as the date the bottles need to be collected at church. Allowing four weeks between the start and end date of your campaign is recommended.

2 Distribute

Distribute bottles. Inform your congregation of these easy steps:

1. Take a bottle home and place it in a popular place
2. Fill the empty bottle(s) with coins, cash, and/or checks, OR donate online
3. Pray for the center and clients

3 Promote

Announce your campaign to your church congregation. Please include our provided insert in your bulletin and/or newsletter. To encourage additional participation and to reach those who watch services online, please consider posting the campaign and the online baby bottle campaign option to your social media channels.

4 Return

Return the filled and empty bottles to Reach Out soon after your last collection date. If you need assistance, please contact us, and one of our staff members can pick up the bottles at the end of your campaign. Please allow for a 4-week turnaround time for us to count your bottles and send your church a report on how much your campaign raised.
